

University of Florida

CALM Plans Follow-up Friday

*This meeting is being recorded 

4/15/2022

Announcement

- The Osprey eggs
hatched!!!**
- **Three chicks in
total**

Icebreaker Question

What is your favorite National Park?

Meeting Goals & Agenda

Today's Meeting Goals

- Share experiences and ideas from Site Visit #5 & #6
- Receive feedback on the User Survey

Meeting Agenda

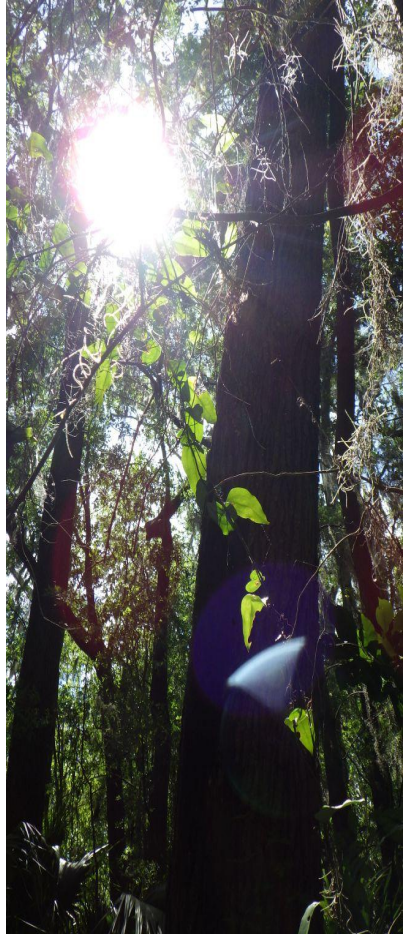

- Core Values
- Site visit photos
- Serial Testimony
- Open Discussion & Feedback
- User Survey Review

Core Values

- Committing to full participation
- Sharing collective wisdom for inclusive solutions
- Accepting shared responsibility
- Embracing creativity and a “what if?” mindset
- Supporting open & equitable discussion
- **Have Fun!**

Bat House Woods & Lake Alice Photos (Thank you, Derek!)

President's Park & University Park Arboretum

Pictures from 2005 CALM Plan:

Quick Overview of Serial Testimony

- Each participant is given two minutes to speak.
- While a participant is speaking, attendees actively listen but do not react (stay on mute, do not write in the chat).
- If a participant decides not to speak the full two minutes, we will move onto the next participant.
- There will be ample opportunity for dialogue following this exercise.

Let's take a few minutes to jot down our thoughts...

Guiding Questions

- Are there any obvious human interventions that impact the site negatively? Positively?
- Is the conservation area accessible to all types of users (ex. Differently abled persons)?
- How is this conservation area used and how could it be used in the future (nature walks, teaching, general exercise, mindfulness, etc.)?
- How do the surrounding sites and uses potentially impact the conservation area?
- Is this conservation area actively maintained? Should it be?
- Are the boundaries of the conservation area clearly distinguishable?
- Are there any new best management practices we should consider in this conservation area?
- We encourage you to pause frequently and actively consider what your different senses are experiencing (hear, see, smell, feel).
- Are there any additional observations/considerations we should be aware of for this conservation area (ex. Rare plant species)?

Discussion

Open Discussion & Feedback

UF Qualtrics Survey

DRAFT:

Please provide the name of the conservation area you would like to provide comment on (ex. Harmonic Woods):

Please select the ways in which you interact with the conservation area (select all that apply):

I come here to be in nature and see wildlife

I use the paths to get to where I'm going faster

I use the area for research or educational purposes

I use the paths for outdoor recreation and exercise

I come here to practice mindfulness

Other:

Please indicate on a scale from 1-5 whether you agree (1) or disagree (5) with the following statements:

The conservation area is well maintained.

I feel safe in the conservation area.

I knew that this space was a conservation area.

The conservation area is accessible to all types of users.

Please provide any additional thoughts, concerns or recommendations:

Thank you!!!
